On Tour Again - December 1998

Spending the christmas days under the tropical Sun turned out to be a nice experience for us five Germans who went to Fiji, where we discovered a delightful paradise and its friendly inhabitants. About the same number of Fijians and Indians live on the island providing for an interesting mixture of customs, cultures and cuisines. We stayed at the Horizon Beach Resort near Nadi airport on Vitu Levu's West coast finding both a helpful crew and space enough to erect two verticals and a beam. The sun surprised us with 150 spots facilitating our traffic with Europe around the clock. When after 16000 QSOs we closed our logs, Europe had a share of 40%. Just the other way round all our nine-band-contacts were Ws and JAs.

Anyway, hoping you had fun catching us, we'll be seeing you from our next DX-spot ...
