Tnx for the QSO 73 de 3Y0J

An international team of 12 operators activated Bouvetoya between February 6th and February 13th 2023. The operation was highly affected by a storm that impacted the logistics of setting up the camp. During 15 days around the island the team thus experienced short weather windows that only allowed a small setup. 3Y0J was active on mainly 30/17/15m on CW/SSB and digital mode and made in total 19.000 QSOs, where 50% were unique callsigns. We would like to thank all organizations, clubs and individual sponsors that supported us and made this DXpedition possible.
